Education

University of California, San Diego
Ph.D. in Economics, fourth-year student (2023-2028)

Barcelona School of Economics
M. Sc. in Economics and Finance (2021)

Sant'Anna School of Advanced Studies & University of Pisa
M. Sc. in Economics (2020)

University of Pisa
B. Sc. in Economics (2018)

Past Employment

Now-Casting Economics, Sr. Economist (2021-2024)

London Business School, Research Associate (2022-2023)

CEPR, RA for Prof. Lucrezia Reichlin, Veronica Guerrieri, Silvana Tenreyro (2023)

Fields

Macroeconomics, Applied Econometrics

Working Papers

The Macroeconomic Effects of Global Supply Chain Shocks (2025) [PDF]

This paper provides evidence that global supply chain shocks are key drivers of business cycle fluctuations, introducing a novel identification strategy based on a narrative analysis of price surcharges from the three largest container shipping companies. Negative shocks cause a persistent rise in consumer prices and a prolonged decline in economic activity. Sectoral impacts vary with exposure to global supply chains, measured by the share of inputs sourced from abroad. Spillovers extend to non-tradable sectors. These shocks accounted for up to 45% of the post-pandemic inflation. Without monetary or fiscal stimulus, recovery would have taken 18 months longer.

Awards: International Association for Applied Econometrics (IAAE) Best Student Paper Award 2026; 2026 Walter Heller Memorial Prize (Best 3rd Year Paper UCSD Econ)

A Hundred Years of Business Cycles and the Phillips Curve (2024). With Lucrezia Reichlin and Giovanni Ricco [PDF] (*R&R The Economic Journal*)

US business cycles since 1900, examined through a multivariate trend-cycle model consistent with a New Keynesian economy, reveal robust reduced-form regularities between slack, prices and unemployment. Once long-term trends are accounted for, a single common cycle underlies output, unemployment, prices, inflation expectations and the policy rate, and behaves as a demand cycle. The slope of inflation on unemployment is -1.08 over the century, against -0.40 in the raw data, and around -0.80 in postwar subsamples. Okun's law, connecting unemployment and output, is an equally robust relation in the data.

Ongoing Projects

Micro-to-Macro, Time Fixed Effects and Identification Failure.

Efficient AI Router with Missing Observation. With Xinwei Ma and Jingshen Wang

Nowcasting Inflation. With Caterina Grossi, Lucrezia Reichlin and Giovanni Ricco [Early Draft]

2026: Spring Midwest Macroeconomics Meeting; SED Annual Meeting Athens; BSE Summer Forum 2026; IAAE Portugal 2026; Piraeus International Economic Conference, University of Piraeus; Oslo Macro Conference 2026, Norges Bank; CEM-SNDE Conference, Reserve Bank of Australia; Macroeconomic Seminar Series, UCSD.

2025: Southern California Applied Economics (SOCAE) Conference, UCLA; Macroeconomic Seminar Series, UCSD.

2024: Macroeconomic Seminar Series, UCSD.

2023: VII Annual Santiago Macro Workshop, PUC-Chile*; University of Porto*; Macroeconomic Seminar Series, UCSD.

Honors and Awards

2026 Walter Heller Memorial Prize (Best 3rd Year Paper UCSD Econ)

IAAE 2026 Best Student Paper Award, Honorable Mention

Zhao Family Research Fellowship, UCSD, for the most promising research in econometrics (2026)

Graduate & Professional Student Association Travel Grant Award, UCSD (2026)

Research Fellowship, UCSD. Sponsor: Prof. James D. Hamilton (2026, 2025, 2024)

Travel and Research Grant, UCSD Economics Department (2026×4, 2025)

Teaching Assistance Excellence Award, UCSD (2025)

Regents Fellowship, UCSD (2023)

Summer Research Fellowship, UCSD (2023)

Summer School Scholarship, The Julius Maximilians University of Würzburg (2021)

Unicredit Foundation MasterScholarship, Barcelona School of Economics (2020)

Graduate Merit Award, Barcelona School of Economics (2020)

Leonardo SPA Merit Award, University of Pisa (2020, 2019, 2018, 2017, 2016, 2015)

Teaching Experience

University of California, San Diego

Cross-Sectional Econometrics, Ph.D. Core sequence (2026, 2025) [**Website**]

Panel Data Econometrics, Ph.D. Core sequence (2026, 2025) [**Website**]

Introductory Econometrics, undergraduate sequence (2026, 2025, 2024) [**Website**]

Macroeconomics Material, Bayesian VAR [**Website**] and Monetary Economics [**Website**]
